Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-19, drawn to a piezoelectric ceramic having a defined formula, classified in class 252, subclass 62.9PZ.
- II. Claims 20-31, drawn to a method for producing a poled piezoelectric ceramic where the formula is not given, classified in class 264, subclass 435.

The inventions are distinct from each from the other because of the following reason:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not capable of use together and they have different modes of operation.

If applicant includes the formula of claim 1 into claim 20, then the inventions are distinct from each from the other because of the following reason:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed can be made by another and materially different process, such as forming a homogenous mixture of the required metal compounds by co-precipitation, calcining the co-precipitated mixture which would occur at a lower temperature range than that in claim 20, molding the calcined powder into a green article, sintering the article at a temperature in the range of 1000-1300°C and poling the sintered article under the conditions of claim 20.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Jim Myers on 17 November 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Pursuant to the procedures set forth in the Official Gazette notice dated March 26, 1996 (1184 O.G. 86), claims 20-31 directed to the process of making or using the patentable product, may be rejoined if claim 20 includes all the limitations of claim 1 and if claim 1 is found allowable.
